

Local Wineries

***Tower Rock Vineyard & Winery**, known for its award-winning wines, attractive vistas and happy and relaxed atmosphere. Owned and operated by Nancy Hadler and her son Ben, Tower Rock is in its second decade of operation. Cultivated on the tree-acre vineyard is the red wine grape Cynthiana, which is the official grape of the State of Missouri. Our white wine grapes are Seyval, Traminette, Vidal and Vignoles. In addition, the winery sources from neighboring vineyards choice grape varieties, and from time to time offers special fruit-based varieties – peach, apple, plum, etc.

Nancy and Ben have strong family ties to Perry County. Nancy's mother and father hail from Crosstown and Menfro, respectively, and are happy to welcome vineyard-goers and wine-lovers from throughout Missouri, Illinois and beyond. They purchased the vineyard from Cheryl Breuer, who with her late husband Bob began establishing the vineyard in 1999 and started the winery in 2001.

***Fusion Wines** was established in 2009 by Tim and Linda Schubert in Perry County, Missouri, located about 90 miles south of St Louis in Southeast Missouri. In 2004 Tim and Linda started their vineyard in part of the Ozark Mountain American Viticulture Area named Schubert Vineyards. For the past six years they have been growing high quality Chambourcin and Traminette cultivars and selling them to a local winery. It seemed only natural for them to transition themselves into the next phase of the wine business. So, in the summer of 2009, Tim and Linda along with their adult children, who also have experience in the wine industry, developed Fusion Wines. They teamed up with award winning winemaker Tony Saballa, also currently with Charleville Vineyards, to create exceptional Missouri wines. Fusion Wines was developed to offer consumers, restaurants and businesses the opportunity to have custom labeled wine at a competitive price. They loved the thought of blending wine enthusiast's lives, experiences and events together with wine. While the idea of custom labeled products may not be exactly new, the Schubert family saw an increase in interest for this in the wine industry. They wanted to offer this along with one thing that is very important to them: legendary customer service! The one on one service from Fusion Wines sets them apart from the competition. Fusion Wines is dedicated to bringing quality wines, made from quality grapes together with legendary customer service to create a custom label that you will be proud to serve at your next event.

***The Barrens Winery** opened in July, 2010 in Perryville, MO. Several years ago when owner Larry Huber was thinking about retiring, a friend had asked if we could help with their grape harvest one year, they needed a tractor driver. Larry agreed and at that time he was hooked. He asked the friend if we could have 2 starts to see if he could grow grapes. So he planted them in the back yard. He found out he could. We then talked to their kids to see if they would be interested. Well the rest is history. We went from 2 plants to 2 acres on CR 902 next to the Zoellner home to 8 acres on North Highway 51. We will have 10 acres of grapes in production in the year 2010. They are growing Chambourcin which is a red grape, Traminatte, and Vinyoles which are both white grapes.

The Barrens Winery offers sandwiches, salads and appetizers, with special events by reservation only. For more information and a list of upcoming events, please visit their website which is listed below.
